Kirchenfeld Robotics

CABLE GUARD

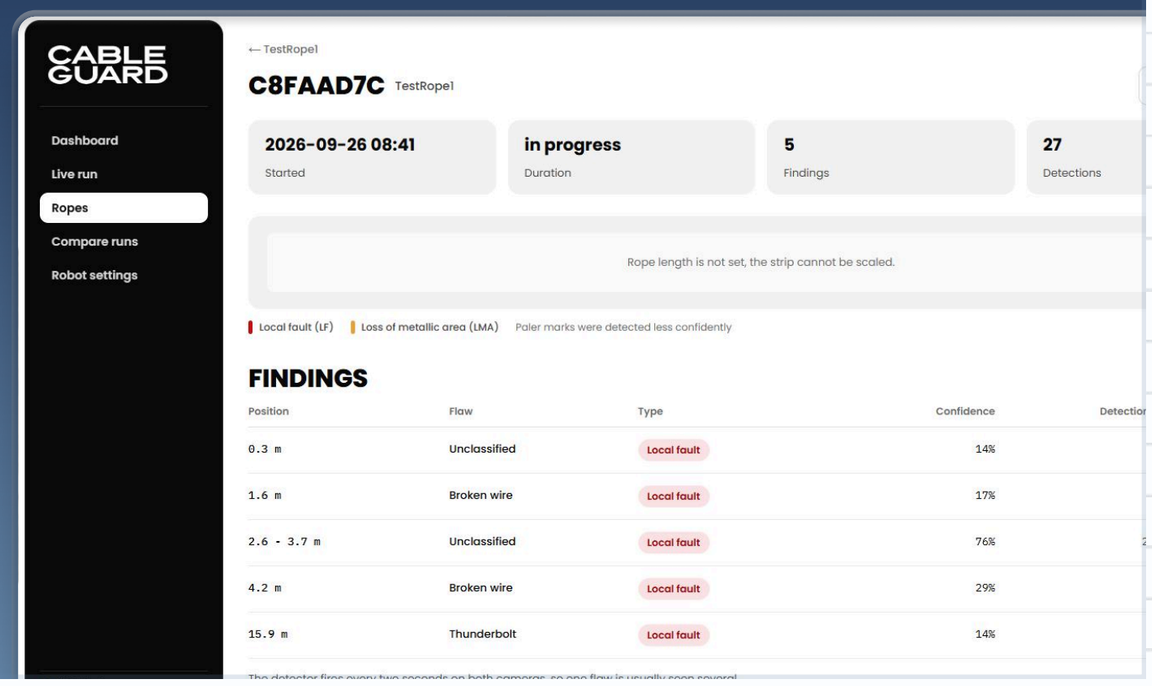

Sponsored by

HOW IT WORKS

Simply Run Session on Rope

Live Inspection & Analysis in Web App

1 Night Run

The robot drives along the rope while the cableway is closed.

2 AI Check

The AI model marks every damage with a photo and its position.

3 Morning Report

The operator sees what is new and decides what to do.

BUSINESS & ROADMAP

Every rope gets a history: inspection as a service for small cableways.

We start with the 250 small cableways in Switzerland.

CHF 400
per rope - inspection as a service

CHF 1.800
per robot/year - subscription

≈ CHF 600
parts of one robot

2026 - PROOF
- Find 90%+ of damages

2027 - PILOT
- Longterm test on a real rope

2028 - COMPANY
- GmbH, first paying operators

2029 - EXPANSION
- Cranes, elevators, bridges, etc.

WHO IT HELPS

Operators
See damage early and plan repairs in time.

Inspectors
Get photos and positions instead of notes.

Passengers
Ride on ropes that are checked every night.
